

The screenshot shows the 'Setup' page for the Palo Alto Networks management interface. The main heading is 'Address' under the 'General' tab. The 'Address Definition Setup' section is active, showing a table with columns: Name, IP Address, Subnet, and Status. The table contains one entry: '10.10.10.10' with a status of 'Not Set'. The 'General' tab is selected, and the 'Address' object is being configured. The 'Address' field is set to '10.10.10.10'. The 'Subnet' field is set to '255.255.255.255'. The 'Status' field is set to 'Not Set'. The 'Address' field is highlighted in blue. The 'Subnet' field is highlighted in blue. The 'Status' field is highlighted in blue. The 'Address' field is highlighted in blue. The 'Subnet' field is highlighted in blue. The 'Status' field is highlighted in blue.

For example, a phone number is a number field. For that we need to select the phone as data type. Let's see this

Note- Follow above steps 1 to 5 to create field and then follow below steps

1. Select the Phone as the Data Type, then click Next.
2. For Field Label, enter Phone Number.
3. Click Next, Next, then Save & New.
