3.LIGHTNING APP

Apps in Salesforce are a group of tabs that help the application function by working together as a unit. It has a name, a logo, and a particular set of tabs. The simplest app usually has just two tabs. There are two types of app - **Standard App**: Standard apps come with every occurrence of Salesforce as default. Many features like Sales, Marketing, Community, call center, content, Salesforce Chatter, App Launcher, etc are present in it.

Note: The description, Logo, and Label of standard app cannot be altered.

Custom Apps: Custom apps are created according to need of user. Custom Apps are made by using standard and custom tabs together.
