Year & Dep : 4th year & CSE
Batch : 2024
Zone no : Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Solution:

Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College_C" and "C Department_C". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** Includes the Salesforce logo, a search bar labeled "Search Setup", and various navigation icons.
- Breadcrumbs:** "Setup" > "Object Manager" > "New Custom Object".
- Title Bar:** "SETUP" and "New Custom Object".
- Page Content:**
 - New Custom Object:** The main title of the configuration page.
 - Message Bar:** A yellow bar at the top stating, "Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles." It includes links to "Tell me more!" and "Don't show this message again".
 - Custom Object Definition Edit:** The main section for defining the custom object.
 - Custom Object Information:**
 - The singular and plural labels are used in tabs, page layouts, and reports.
 - Label:** college (Example: Account)
 - Plural Label:** colleges (Example: Accounts)
 - Starts with vowel sound:**
 - Object Name:** college (Example: Account)
 - Description:** (Large text area)
 - Context-Sensitive Help Setting:**
 - Open the standard Salesforce.com Help & Training window
 - Open a window using a Visualforce page
 - Content Name:** None
 - Enter Record Name Label and Format:**
 - The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.
 - Record Name:** college Name (Example: Account Name)
 - Data Type:** Text
 - Optional Features:**
 - Allow Reports
 - Allow Activities
 - Track Field History
 - Allow in Chatter Groups
 - Enable Licensing
 - Object Classification:**
 - When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. Learn more.
 - Allow Sharing
 - Allow Bulk API Access
 - Allow Streaming API Access
 - Deployment Status:**
 - In Development
 - Deployed
 - Search Status:**
 - When this setting is enabled, your users can find records of this object type when they search. Learn more.
 - Allow Search
 - Object Creation Options (Available only when custom object is first created):**
 - Add Notes and Attachments related list to default page layout
 - Launch New Custom Tab Wizard after saving this custom object
- Buttons:** "Save", "Save & New", and "Cancel".

Second custom objects, let's call them
"Department_C"

The screenshot shows the Salesforce Setup interface with the 'Object Manager' tab selected. The main title is 'New Custom Object'. A message bar at the top indicates that permissions for the object are disabled by default. The form is titled 'Custom Object Definition Edit' and contains several sections:

- Custom Object Information:** Fields include 'Label' (department), 'Plural Label' (departments), and 'Example' (Account). A note says 'Starts with vowel sound' with an unchecked checkbox.
- Object Name:** Shows 'Object Name' (department) and 'Example' (Account).
- Description:** A large text area with a placeholder '6'.
- Context-Sensitive Help Setting:** Options include 'Open the standard Salesforce.com Help & Training window' (selected) and 'Open a window using a Visualforce page'.
- Content Name:** Set to 'None'.
- Enter Record Name Label and Format:** Shows 'Record Name' (Department Name) and 'Example' (Account Name). 'Data Type' is set to 'Text'.
- Optional Features:** Options include 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Licensing' (unchecked).
- Object Classification:** Settings include 'Allow Sharing' (checked), 'Allow Bulk API Access' (checked), and 'Allow Streaming API Access' (checked).
- Deployment Status:** Set to 'Deployed'.
- Search Status:** Set to 'Allow Search'.
- Object Creation Options:** Options include 'Add Notes and Attachments related list to default page layout' and 'Launch New Custom Tab Wizard after saving this custom object'.

Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Go to Setup > Object Manager.
2. Click on "College__c" to open its settings.
3. In the left sidebar, click on "Fields & Relationships."

- 4.Click the "New" button to create a new custom field.
- 5.Choose "Master-Detail Relationship" as the data type.
- 6.Enter a label for the relationship, e.g., "Department __c."
- 7.Choose " Department__c" as the related object.
- 8.Configure other settings as needed and click "Next."
- 9.Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the relationship.

The screenshot shows the Salesforce Setup interface for creating a new relationship. The left sidebar lists various setup categories like Details, Fields & Relationships, Page Layouts, etc. The main area is titled 'CDepartment New Relationship' and is on 'Step 2. Choose the related object'. It shows a dropdown menu with 'college' selected. Navigation buttons at the bottom include 'Previous', 'Next', and 'Cancel'.

The screenshot shows the Salesforce Setup interface for creating a new custom field. The left sidebar lists various setup categories. The main area is titled 'CDepartment New Custom Field' and is on 'Step 1. Choose the field type'. It shows a 'Data Type' section with 'Master-Detail Relationship' selected. A detailed description of this type is provided, mentioning it creates a parent-child relationship where the master record's value is displayed in detail records. Navigation buttons at the bottom include 'Next' and 'Cancel'.

Step 3: Create the Roll-Up Summary Field

Now, let's create a Roll-Up Summary Field on the "College_C" to calculate the total number of related records in "Department_C":

1. Still on the "College__c" settings, go to "Fields & Relationships."

- 2. Click the "New" button to create a new custom field.**
- 3. Choose "Roll-Up Summary" as the data type.**
- 4. Enter a label for the field, e.g.,**
- 5. Choose "Count" as the Roll-Up Type.**
- 6. Select "Department__c" as the object to roll up information from.**
- 7. Specify the filter criteria if you want to filter the related records.**
- 8. Configure other settings as needed and click "Next."**
- 9. Specify the field-level security and add it to relevant page layouts.**
- 10. Click "Next" and "Save" to create the Roll-Up Summary Field.**

The screenshot shows the Salesforce Object Manager interface for the 'CDepartment' object. The 'Fields & Relationships' tab is selected. A table lists the following fields:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
college	college__c	Master-Detail(college)		✓
Created By	CreatedById	Lookup(User)		
Department Name	Name	Text(80)		✓
Last Modified By	LastModifiedById	Lookup(User)		

The screenshot shows the Salesforce Setup interface under the 'Tabs' section. The left sidebar includes 'User Interface' and 'Rename Tabs and Labels'. The main content area is titled 'Custom Tabs' and contains sections for 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs'. Each section has a 'New' button and a 'What Is This?' link. Under 'Custom Object Tabs', there is a table:

Action	Label	Tab Style	Description
Edit Del	Book1	Box	
Edit Del	Research Proposal	Square	
Edit Del	student	Box	

The screenshot shows the Salesforce Setup interface under the 'Object Manager' section for the 'college' object. The left sidebar lists various settings like 'Page Layouts', 'Buttons, Links, and Actions', and 'Validation Rules'. The main content area is titled 'New Custom Field' and is on 'Step 5. Add to page layouts'. It shows a table with field details and a checkbox for adding the field to specific page layouts. A note at the bottom says to click 'Save & New' to create more fields or 'Save' if done.

Field Label	Total count
Data Type	Roll-Up Summary
Field Name	Total_count
Description	

Select the page layouts that should include this field. The field will be added as the last field in the first 2-column section of these page layouts. The field will not appear on any pages if you do not select a layout.

To change the location of this field on the page, you will need to customize the page layout.

Add Field Page Layout Name
 college Layout

When finished, click Save & New to create more custom fields, or click Save if you are done.

The screenshot shows the Salesforce Object Manager interface for creating a new custom field named "Total count" on the "college" object. The field is defined as a Roll-Up Summary type with the name "Total_count". The "Field-Level Security for Profile" section lists various user profiles with checkboxes for "Visible" and "Read Only" permissions. Most profiles have both checkboxes checked.

Field Label	Field Name	Visible	Read Only
Total count	Total_count	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Analytics Cloud Integration User		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Analytics Cloud Security User		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Cloud Kicks Admin		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Contact Manager		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Cross Org Data Proxy User		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Custom: Marketing Profile		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Custom: Sales Profile		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Custom: Support Profile		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
customer		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Force.com - Ann Subscription User		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

The screenshot shows the Salesforce Object Manager interface for creating a new custom field named "Total count" on the "college" object. The "Step 3. Define the summary calculation" section is active. It shows the "Master Object" as "college" and the "Summarized Object" as "CDepartments". Under "Select Roll-Up Type", the "COUNT" option is selected. The "Field to Aggregate" dropdown is set to "None". In the "Filter Criteria" section, the "All records should be included in the calculation" radio button is selected.

New Custom Field

Step 1. Choose the field type Step 1

Specify the type of information that the custom field will contain.

Data Type

- None Selected Select one of the data types below.
- Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.
- Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.
- Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.
- Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The other object is the source of the values in the list.
 - This relationship field is required on all detail records.
 - The ownership and sharing of a detail record are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create rollup summary fields on the master record to summarize the detail records.
- Master-Detail Relationship Creates a relationship type for parent-child relationships between this object (the child, or "detail") and another object (the parent, or "master") where:
 - The relationship field is required on all detail records.
 - The ownership and sharing of a detail record are determined by the master record.
 - When a user deletes the master record, all detail records are deleted.
 - You can create rollup summary fields on the master record to summarize the detail records.
- External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.
- Boolean Allows users to select a True (checked) or False (unchecked) value.

Next Cancel

The screenshot shows the Salesforce Object Manager interface. At the top, there's a navigation bar with 'Setup', 'Home', and 'Object Manager'. A search bar contains the text 'college'. On the right side of the header are various icons for account management. Below the header, the page title is 'college'. The main content area has a sidebar on the left with links like 'Page Layouts', 'Lightning Record Pages', 'Buttons, Links, and Actions', etc. The main panel is titled 'Fields & Relationships' and shows a table with four items. The table columns are 'FIELD LABEL', 'FIELD NAME', 'DATA TYPE', 'CONTROLLING FIELD', and 'INDEXED'. The data is as follows:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
college Name	Name	Text(80)		✓
Created By	CreatedById	Lookup(User)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓

Step 4: Create a Lightning App

- 1. Type and select "App Manager."**
- 2. Click "New Lightning App."**
- 3. Fill in basic information (Name, Developer Name, Description).**
- 4. Choose the App Type (Standard, Console, Custom).**
- 5. Customize the Logo and Colour Scheme.**
- 6. Configure Navigation Items (objects to appear in the app's menu).**
- 7. Set the App Visibility (default access).**
- 8. Optionally, choose Record Pages (Lightning Record Pages).**
- 9. Review and Save the app.**

10. Assign the app to users or profiles.

11. Test the app with the assigned users.

The screenshot shows the Salesforce Setup interface with the 'Tabs' tab selected under 'User Interface'. The main content area is titled 'New Custom Object Tab' and 'Step 2: Add to Profiles'. It displays a list of user profiles on the left and a grid of 'Tab Visibility' dropdowns on the right. The first dropdown in the grid is set to 'Default On'. The top right corner of the main content area shows 'Step 2 of 3'.

Step 2: Add to Profiles

Choose the user profiles for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each profile.

Apply one tab visibility to all profiles [Default On]
 Apply a different tab visibility for each profile

The screenshot shows the Salesforce Setup interface with the 'Tabs' tab selected. The main content area is titled 'New Custom Object Tab' and is divided into three steps. Step 1, 'Enter the Details', is active. It asks to choose a custom object ('Object' dropdown set to 'college') and a tab style ('Tab Style' dropdown set to 'Jewel'). Below these are fields for a short description and a splash page custom link ('Splash Page Custom Link' dropdown set to 'None'). Step 2, 'Customize the Tab', is visible below. Step 3, 'Add to Custom Apps', is also visible. The top navigation bar includes 'Search Setup', a magnifying glass icon, and various system icons.

The screenshot shows the 'Step 3. Add to Custom Apps' page. It lists various standard and custom apps available for adding to the new tab. A checkbox labeled 'Include Tab' is checked next to every app listed. The apps include Platform, Sales, Service, Marketing, Sample Console, High Volume Customer Portal User, Authenticated Website User, App Launcher, Community, Site.com, Salesforce Chatter, Content, Analytics Studio, Sales Console, Service Console, Sales, Lightning Usage App, Digital Experiences, Queue Management, Data Manager, Bolt Solutions, and Salesforce Scheduler Setup. At the bottom, there is a checkbox for 'Append tab to users' existing personal customizations'. The top navigation bar is identical to the previous screenshot.

The screenshot shows the Salesforce Setup interface with the 'Tabs' page selected. The left sidebar has a search bar and navigation links for 'User Interface' and 'Rename Tabs and Labels'. The main content area is titled 'Custom Tabs' and includes a help link. It displays sections for 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs'. Under 'Custom Object Tabs', there is a table with columns 'Action', 'Label', 'Tab Style', and 'Description'. The table contains five rows:

Action	Label	Tab Style	Description
Edit Del	Book1	Box	
Edit Del	CDepartments	Lightning	
Edit Del	college	Jewel	
Edit Del	Research_Proposal	Square	

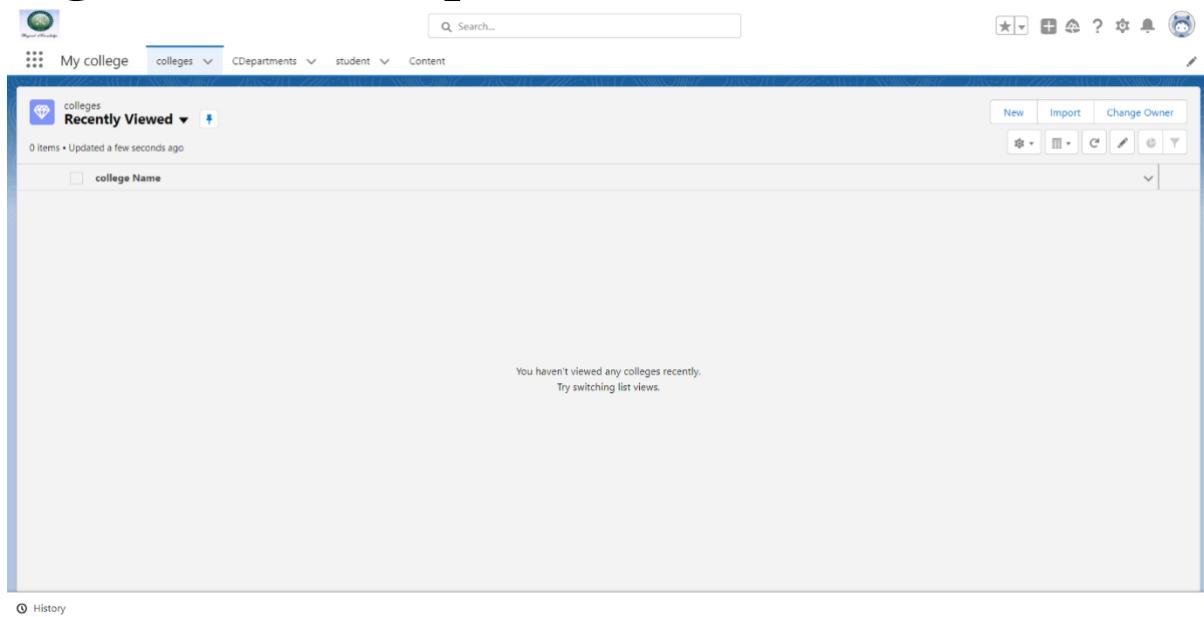

Below this, sections for 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs' show that no items have been defined.

The screenshot shows the Salesforce Setup interface with the 'New Lightning App' page selected. The left sidebar has a search bar and navigation links for 'Salesforce', 'Data', 'Apps', 'Components', 'Lightning', 'Mobile', and 'Setup'. The main content area is titled 'App Details & Branding' and includes a help link. It displays sections for 'App Details' and 'App Branding'. The 'App Details' section contains fields for 'App Name' (My college), 'Developer Name' (My_college), and 'Description' (Enter a description...). The 'App Branding' section contains fields for 'Image' (a circular logo with '20% Beyond Knowledge'), 'Primary Color Hex Value' (#217AC7), and a checkbox for 'Org Theme Options' (checked, with the sub-option 'Use the app's image and color instead of the org's custom theme'). A progress bar at the bottom indicates the process is at step 1 of 6, with a 'Next' button.

Conclusion:

Now, whenever you create or update a record in the "Department__c" related to a "College__c," the "TotalCount__c" field on the "College__c" will automatically update to show the total number of related records.

Remember to adjust field-level security, validation rules, and page layouts as needed to ensure that your custom objects and fields are appropriately configured for your organization's requirements.

The screenshot shows a Salesforce Lightning interface for creating a new college record. The page title is "New college". The "Information" section contains the following fields:

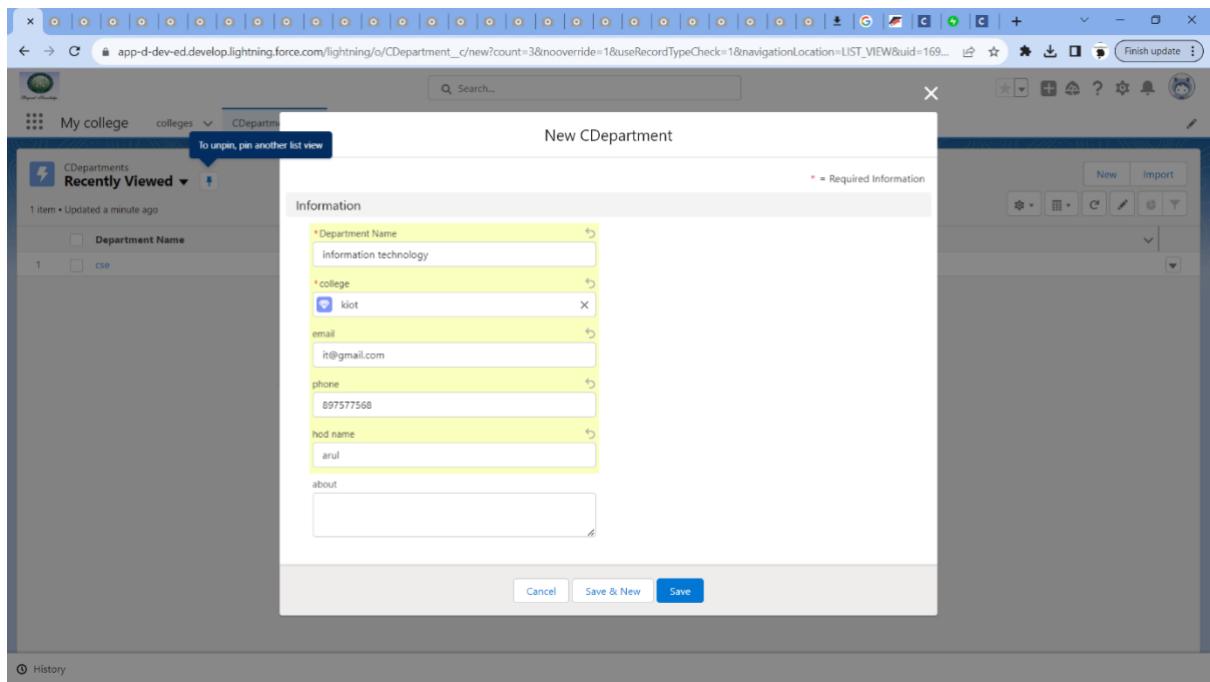

- college Name**: kiot (highlighted in yellow)
- phone**: 9087116402
- Email**: kiot@ac.in
- Location**
 - Latitude: 90
 - Longitude: 80

The "Owner" field shows "krishna s". At the bottom right of the form are buttons for "Cancel", "Save & New", and "Save".

The screenshot shows a Salesforce Lightning interface for managing CDepartments. The page title is "CDepartments". The list view shows one item: "1 item • Updated a few seconds ago". The list includes:

- Department Name**: cse

At the top right of the list view are buttons for "New", "Import", and various list management icons.

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

Solution:

Step 1: Create two separate custom profiles, one for User A and one for User B.

The screenshot shows the Salesforce Setup interface with the 'Profiles' page open. The left sidebar is collapsed, and the main area displays a table of profiles. The table has columns for 'Action', 'Profile Name', 'User License', and 'Custom'. The 'Custom' column contains checkboxes. One profile, 'Chatter External', has its checkbox checked. Other profiles listed include 'Analytics Cloud Integration User', 'Analytics Cloud Security User', 'Authenticated Website', 'Chatter Free User', 'Chatter Moderator User', 'Contract Manager', 'Cross Org Data Proxy User', 'Custom: Marketing Profile', 'Custom: Sales Profile', 'Custom: Support Profile', 'Customer Community Login User', 'Customer Community Plus Login User', 'Customer Community Plus User', 'Customer Community User', and 'Customer Portal Manager Custom'. The table includes navigation buttons at the bottom for '1-25 of 41' and '0 Selected'.

Help for this Page

Screenshot of a web browser showing the Salesforce Setup interface and a Gmail inbox.

The top window is the Salesforce Setup interface, specifically the "Users" page. The user details for "Sowmya bala" are displayed, including her name, email (2k21it@kiot.ac.in), and various profile settings like Marketing User, Active, and Manager. The sidebar shows navigation links for Setup, Home, Object Manager, and various administrative modules.

The bottom window is a Gmail inbox. A new email from support@salesforce.com is visible, with the subject "Welcome to Salesforce!". The email body contains a "Verify Account" button, a URL (<https://artificialintelligence-d-dev-ed-develop.my.salesforce.com>), and a welcome message. The Gmail interface includes a sidebar with Mail, Chat, Spaces, Meet, and Drafts sections.

Salesforce Change Your Password

Enter a new password for 2k21it@kiot.ac.in. Make sure to include at least:

- 8 characters
- 1 letter
- 1 number

* New Password: Good

* Confirm New Password: Match

Security Question: In what city were you born?

* Answer: salem

Change Password

Cancel Save & New Save

The screenshot displays two screenshots of the Salesforce Lightning Experience interface.

Top Screenshot: A 'New customer' modal window is open. It shows the 'Information' section with two required fields: 'customer Name' (containing 'madhu') and 'Bank' (containing 'boi'). Below the form are 'Cancel', 'Save & New', and 'Save' buttons. A note at the top right indicates that an asterisk (*) denotes required information.

Bottom Screenshot: The customer record has been created, and a green success message at the top states 'customer "madhu" was created.' The record details page is shown, featuring tabs for 'Related' and 'Details'. Under 'Details', the 'customer Name' is listed as 'madhu' and the 'Bank' is listed as 'boi'. The 'Created By' field shows 'sowmiya bala, 01/10/2023, 7:17 pm' and the 'Last Modified By' field also shows 'sowmiya bala, 01/10/2023, 7:17 pm'.

The screenshot shows the Salesforce Setup interface for managing Profiles. The left sidebar is titled "Setup" and includes sections for Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Update, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage Optimizer, and ADMINISTRATION. Under ADMINISTRATION, the "Users" section is expanded, showing sub-options: Permission Set Groups, Permission Sets, Profiles (which is currently selected), Public Groups, Queues, Roles, and User Management Settings. The main content area is titled "Profiles" and displays a table of existing profiles. The table columns are: Action, Profile Name, User License, and Custom. The profiles listed are:

Action	Profile Name	User License	Custom
Edit Clone	salesforce API Only System Integrations	Salesforce Integration	<input type="checkbox"/>
Edit Delete	salesman@999	Salesforce	<input checked="" type="checkbox"/>
Edit Clone	Silver Partner User	Silver Partner	<input type="checkbox"/>
Edit Clone	Solution Manager	Salesforce	<input type="checkbox"/>
Edit Clone	Standard Platform User	Salesforce Platform	<input type="checkbox"/>
Edit Clone	Standard User	Salesforce	<input type="checkbox"/>
Edit Clone	System Administrator	Salesforce	<input type="checkbox"/>

At the bottom of the page, there are navigation links for "1 of 7" and "0 Selected", and a footer bar with links to "4 Previous", "Next > 10", and "Page 1 of 1".

The screenshot shows the Salesforce Setup Home page. The left sidebar is titled "Setup" and includes sections for "Quick Find", "Setup Home", "Service Setup Assistant", "Multi-Factor Authentication Assistant", "Hyperforce Assistant", "Release Updates", "Lightning Experience Transition Assistant", "Salesforce Mobile App", "Lightning Usage", and "Optimizer". Under "ADMINISTRATION", there are sections for "Users" (with "Profiles" selected), "Permission Set Groups", "Permission Sets", "Public Groups", "Queues", "Roles", "User Management Settings", and "Users". The main content area is titled "SETUP Profiles" and shows a "Clone Profile" dialog. It prompts the user to "Enter the name of the new profile." Below this, a note says "You must select an existing profile to clone from." A table lists "Existing Profile" as "Standard Platform User", "User License" as "Salesforce Platform", and "Profile Name" as "Salesmanager". At the bottom of the dialog are "Save" and "Cancel" buttons.

Step 2:

Permission Sets:

- Create two permission sets, one for User A and one for User B.

Object-Level Security:

- In each profile and permission set, set the object-level security for the Account object to "Read" to ensure that both User A and User B can view Account records.

Record-Level Security:

- Implement record-level security using Criteria-Based Sharing Rules.
- Create a sharing rule that shares Account records owned by User A with User A and records owned by User B with user B.
- For the sharing rule criteria, specify that records owned by User A are shared with user A, and records owned by User B are shared with User B.

Ownership:

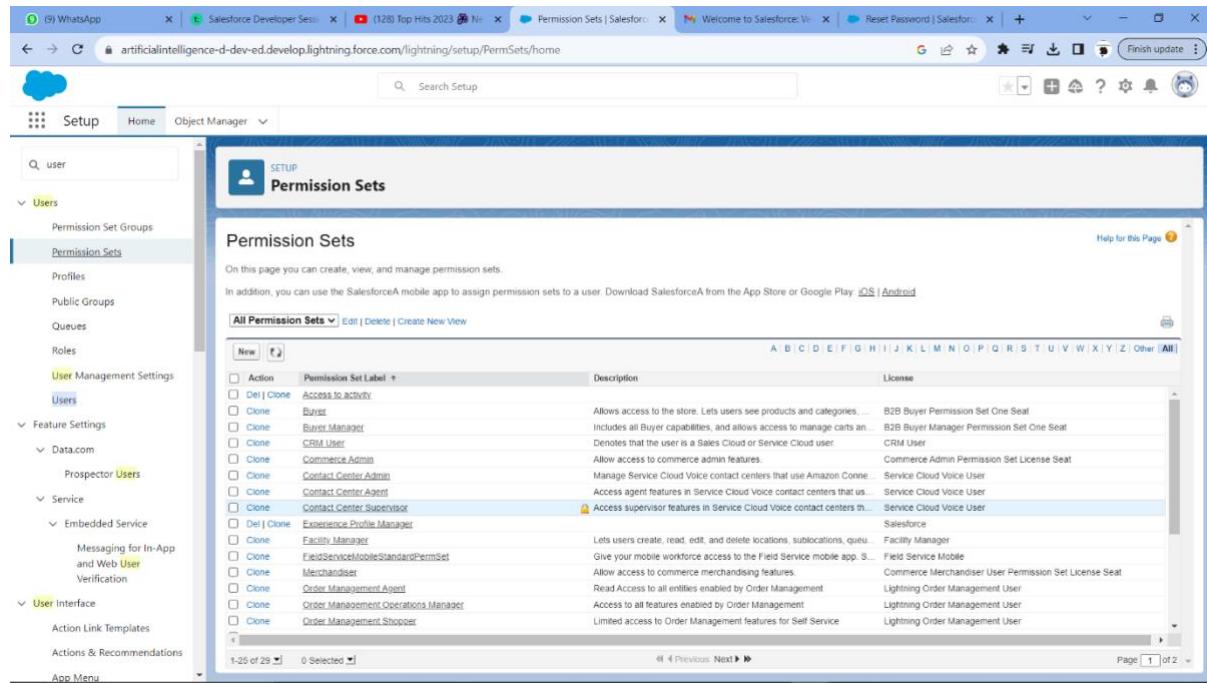

- Ensure that the Account records are owned by the respective users, with User A owning their records and User B owning their records.

Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

Testing:

- Test the setup by logging in as User A and User B separately to verify that they cannot access each other's records.

The screenshot shows the Salesforce Setup interface with the 'Permission Sets' page open. The left sidebar navigation includes 'User Management Settings' under 'Users', 'Feature Settings', 'Data.com', 'Service', 'Embedded Service', and 'User Interface'. The main content area displays a table of permission sets with columns for Action, Permission Set Label, Description, and License. The table lists various roles like 'Access_to_activity', 'Buyer', 'Buyer_Manager', etc., along with their descriptions and associated licenses such as 'B2B Buyer Permission Set One Seat' and 'CRM User'. The table is paginated at the bottom with '1-25 of 29' and '0 Selected'.

3.. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

Solution:

Step 1: we need create a profile for the two user which has the access to Create, Read, Edit for follow as per.

Setup-quick search[profile]

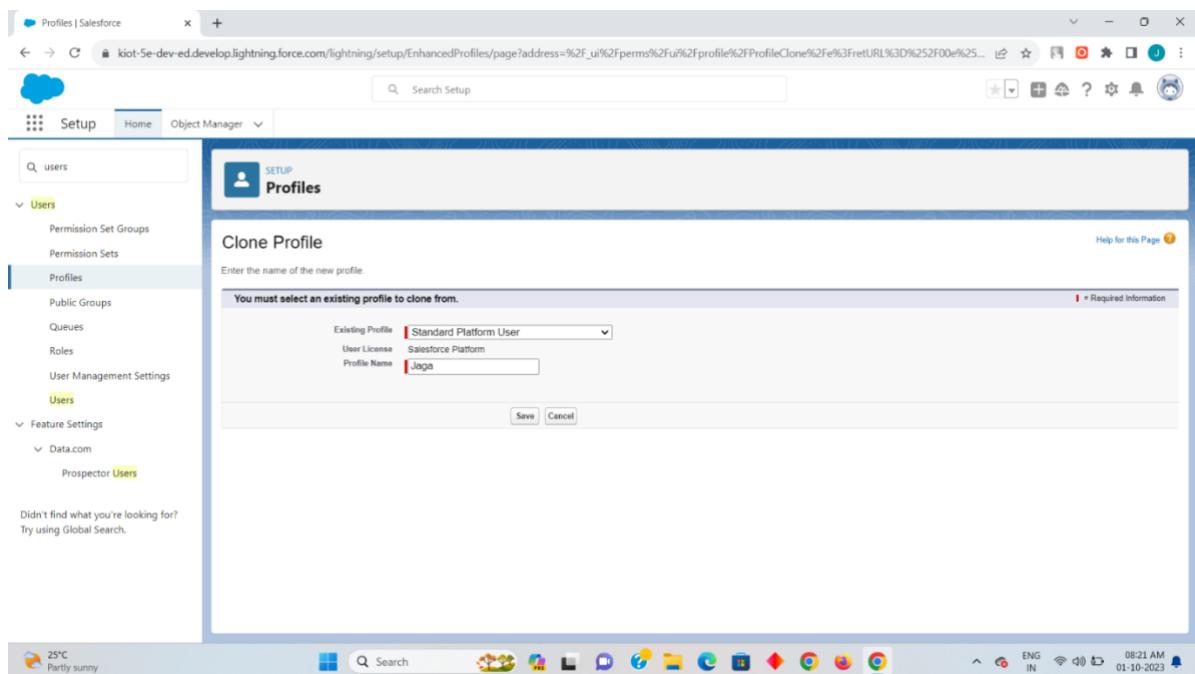

The screenshot shows the Salesforce Setup interface with the following details:

- Page Header:** Profiles | Salesforce
- Search Bar:** Search Setup
- Left Navigation:** Setup, Home, Object Manager. Under "Users", "Profiles" is selected. Other sections like "Permission Set Groups", "Permission Sets", "Public Groups", "Queues", "Roles", "User Management Settings", "Feature Settings", and "Data.com" are also visible.
- Page Title:** Profiles
- Section:** Profiles
- Buttons:** All Profiles, Edit | Delete, Create New View, New Profile, Help for this Page.
- Table:** A grid of profiles with columns: Action, Profile Name, User License, and Custom. Some profiles have checkboxes next to them. Examples include "Analytics Cloud Integration User" (User License: Analytics Cloud Integration User), "Authenticated Website" (User License: Authenticated Website), and "Chatter External User" (User License: Chatter External).
- Page Bottom:** Page 1 of 2, with navigation arrows and a search bar.
- System Status:** 25°C Partly sunny, ENG IN, 08:20 AM, 01-10-2023.

Step 2:

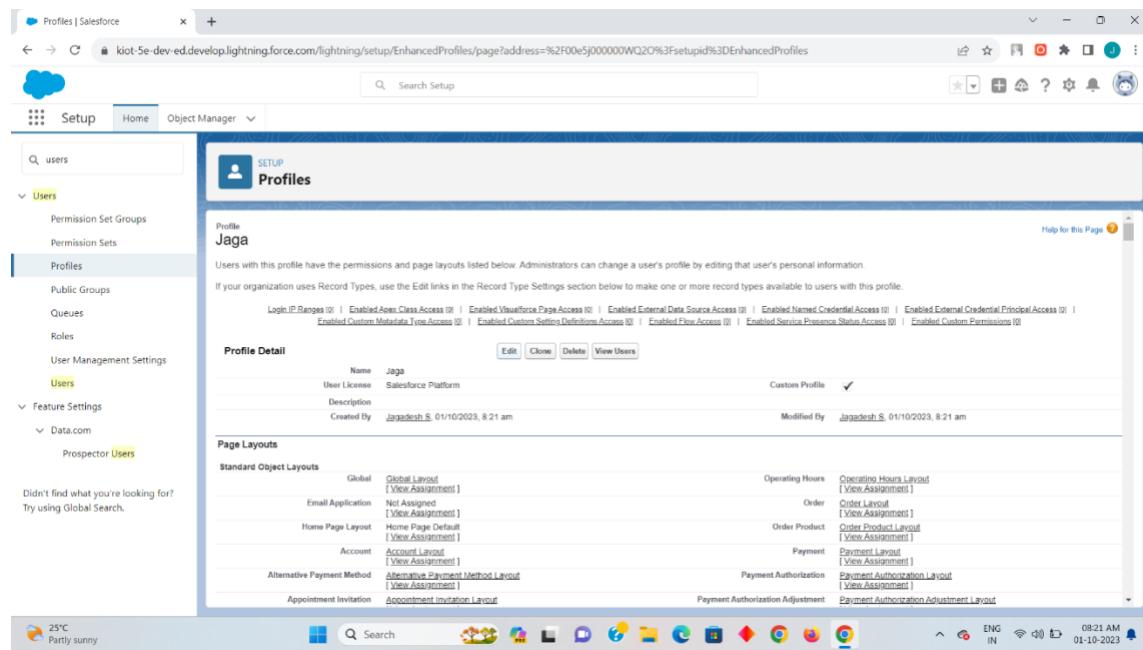

Click on the new to create a new profile along with the label and Api

Here I had made it my profile name as Jaga and the existing profile as Standard Platform User.

Step 3:

Now click on the edit and scroll down to custom object settings and enable the read,create,edit and view options. After that click on save.

Step 7:

Now to give the specific delete access to the user click on edit on the Account and then enable the read,create,edit and the delete on it so that the permission set will have a specific special access on it. once it has been done click on save and then click on manage assignment.

The screenshots illustrate the configuration of a Permission Set named 'permission12' for the 'Accounts' object. In the 'Object Permissions' section, the 'Delete' checkbox is selected under the 'Enabled' column for the 'Accounts' permission. In the 'Field Permissions' section, the 'Delete' checkbox is also selected under the 'Edit Access' column for the 'Account' field.

Step 8

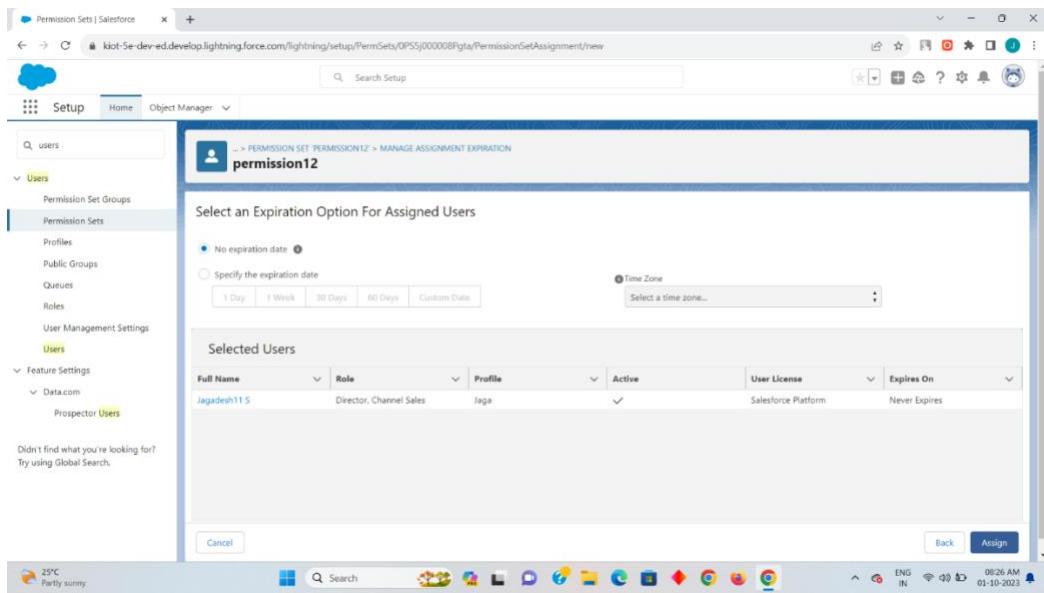

Now click on add assignment there you will find your two created users click on any one user to give a special access as delete on it and then click on assign so that the specific selected user can have a special access as delete on it.

The screenshot shows the 'Permission Sets | Salesforce' page in a browser. The URL is kiot-5e-dev-ed.lightning.force.com/lightning/setup/PermSets/OPSS000008PgtA/PermissionSetAssignment/home. The left sidebar is open, showing 'Users' under 'Permission Set Groups'. The main content area is titled 'permission12' and shows the 'Current Assignments' section. It features a decorative illustration of a cactus, sun, and clouds. Below the illustration, a message says 'No assignments defined.' There is a 'Add Assignment' button at the top right of the list area.

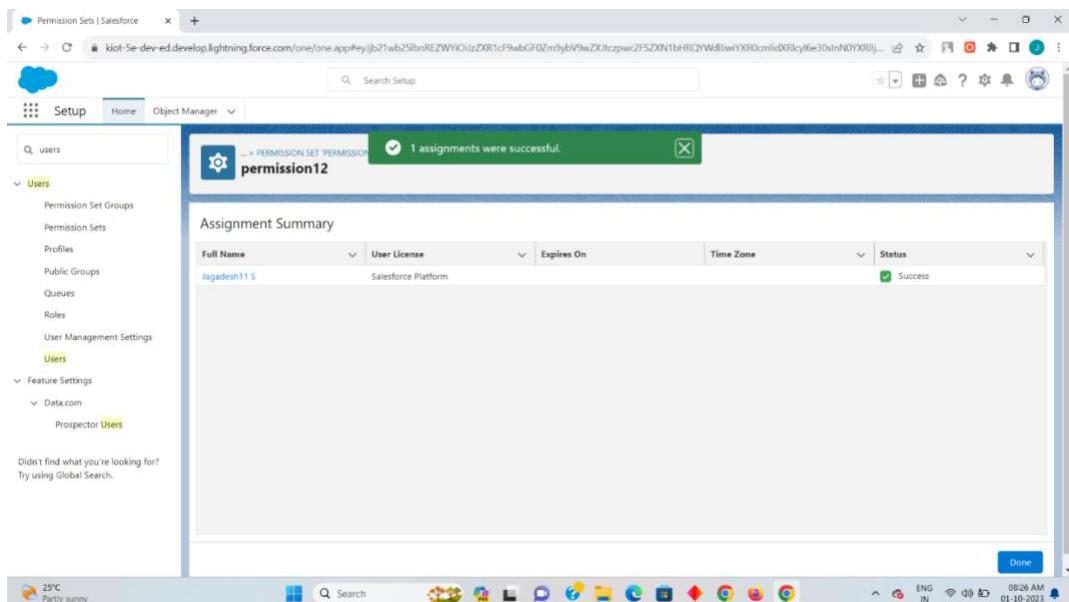

This screenshot shows the 'PERMISSION SET permission12 > MANAGE ASSIGNMENT EXPIRATION' step. The search bar at the top contains 'jagadesh'. The results table lists four users: jagadesh, jagadesh11, jagadesh22, and jagadesh11. The 'jagadesh' row is selected, indicated by a checked checkbox in the first column. The table includes columns for Full Name, Alias, Username, Role, Active status, and Profile. A note at the top right of the table area states: 'Role, Alias, and Profile aren't searchable. Use filters or sort on these fields instead.'

This screenshot shows the same 'PERMISSION SET permission12 > MANAGE ASSIGNMENT EXPIRATION' step. The search bar now contains 'jagadesh11'. The results table shows the same four users. The 'jagadesh11' row is now selected, indicated by a checked checkbox in the first column. The table structure remains the same with columns for Full Name, Alias, Username, Role, Active status, and Profile.

Click on next.

Now click on Assign.

Now the specific access for the Jagadesh11 user has been assigned successfully.

4.Create a screen flow for a basic survey to fill in the details for any form.

Solution:

Step 1: Create a Custom Object

The next step is to create a custom object **Survey Result** and a few custom fields to store survey responses.

1. Click **Setup**.
2. In the Object Manager, click **Create | Custom Object**.
3. Now create a custom object **Survey Result** and fields as shown in the screenshot below:
4. Click **Save**.

Details		Fields & Relationships				
		FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Page Layouts	Comment	Comment__c	Text Area(255)			▼
Lightning Record Pages	Created By	CreatedById	Lookup(User)			▼
Buttons, Links, and Actions	Email	Email__c	Email			▼
Compact Layouts	Last Modified By	LastModifiedById	Lookup(User)			▼
Field Sets	Name	Name__c	Text(51)			▼
Object Limits	Owner	OwnerId	Lookup(User,Group)		✓	▼
Record Types	Rating	Rating__c	Picklist			▼
Related Lookup Filters	Survey Result Name		Name	Auto Number	✓	▼
Search Layouts						
Search Layouts for Salesforce Classic						
Triggers						
Validation Rules						

Step 2: Create a Thank You For Survey Lightning Email Template

1. Click **App Launcher**.
2. In the Quick Find box, type **Email Templates**.
3. Clicks on the **New Email template** button.
4. Name the **Lightning Email Template** and make sure to store it in the **Public Email Templates** folder.
5. Create a template like the following screenshot.

Email Template
Thank You Email - Survey

Details Related

Information

Email Template Name Thank You Email - Survey	Related Entity Type Survey Result
Description	Folder Public Email Templates
Made in Email Template Builder <input checked="" type="checkbox"/>	

Message Content

HTML Value	<p>Hi {{{Survey_Result__c.Name__c}}},</p> <p>Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.</p> <p>Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.</p> <p>Thanks, Automation Champion</p>

Additional Information

Created By Rakesh Gupta, 12/21/2020, 4:23 PM	Last Modified By Rakesh Gupta, 12/21/2020, 4:32 PM
---	---

Step 3: Create an Email Alert

- 1. Click Setup.**
- 2. In the Quick Find box, type Email Alerts.**
- 3. Select Email Alerts, click on the New Email Alert button.**
- 4. Name the Email Alert and click the Tab button. The Unique Name will populate.**

- 5. For Object select Survey Result.**
- 6. For the Email Template chooses Lightning Email Template Thank You Email – Survey.**
- 7. For Recipient Type select Email Field: Email.**
- 8. Click Save.**

Survey - Thank You Email

Description: Survey - Thank You Email

Unique Name: Survey_Thank_You_Email

Object: Survey Result

Email Template: Thank You Email - Survey

Recipient Type: Email Field: Email

Available Recipients:

- User: Integration User
- User: Rakesh Gupta
- User: Security User

Selected Recipients:

- Email Field: Email

You can enter up to five (5) email addresses to be notified.

From Email Address: Current User's email address

Step 4.1: Salesforce Flow — Create a Screen that Allow Users to Fill Survey

- 1. Click Setup.**

2. In the Quick Find box, type **Flows**.
3. Select **Flows** then click on the **New Flow**.
4. Select the **Screen Flow** option and click on **Next** and configure the flow as follows:
 1. **How do you want to start building:** **Freeform**
5. We will use the **Screen** element to capture a **Survey response** form. Drag and drop a **Screen** element onto the canvas.

Step 4.2: Salesforce Flow — Add a Record Creates Element to Save Survey Response

1. Drag-and-drop the **Create Records** element onto the Flow designer.
2. Enter a name in the **Label (Save Response)** field; the **API Name** will auto-populate.
3. For **How Many Records to Create** – select **One**.
4. For **How to Set the Record Fields** – select **Use separate resources, and literal values**.
5. Select the **Survey_Result__c** object from the dropdown list.
6. **Set Field Values for the Survey Result**
 1. Row 1:
 1. **Field: Comment__c**

2. **Value:** `{!Comment}`
2. Click **Add Row**
3. Row 2:
 1. **Field:** `Email__c`
 2. **Value:** `{!Email.value}`
4. Click **Add Row**
5. Row 3:
 1. **Field:** `Name__c`
 2. **Value:** `{!Name.firstName}`
`{!Name.lastName}`
6. Click **Add Row**
7. Row 3:
 1. **Field:** `Rating__c`
 2. **Value:** `{!Rating}`
7. Click **Done.**

Edit Create Records

Create Salesforce records using values from the flow.

* Label: Save Response * API Name: Save_Response

Description:

How Many Records to Create
 One
 Multiple

How to Set the Record Fields
 Use all values from a record
 Use separate resources, and literal values

Create a Record of This Object
* Object: Survey Result

Set Field Values for the Survey Result

Field	Value
Comment__c	<input type="text" value="A_a Comment"/>
Email__c	<input type="text" value="A_a Email > Value"/>
Name__c	<input type="text" value="(!Name.firstName) {!Name.lastName}"/>
Rating__c	<input type="text" value="A_a Rating"/>
+ Add Field	
<input type="checkbox"/> Manually assign variables	

Cancel Done

Step 4.3: Salesforce Flow — Call an Acton — Email Alert to Send Out Thank You Email

The next step is to call the **Survey – Thank You Email** email alert from flow so that when flow fires it triggers the thank you email to survey participants.

1. Under **Toolbox**, select **Element**.
2. Drag-and-drop **Action** element onto the Flow designer.
3. In the **Action** box, type **Survey – Thank You Email**.

4. Clicks on the Survey – Thank You Email email alert.

5. Click Done.

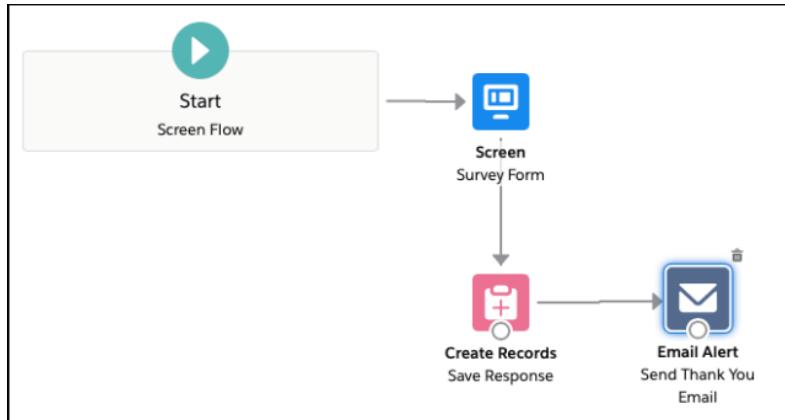

Edit "Survey - Thank You Email" email alert

Use values from earlier in the flow to set the inputs for the "Survey - Thank You Email" email alert. To use its outputs later in the flow, store them in variables.

* Label	* API Name
Send Thank You Email	Send_Thank_You_Email
Description	
Set Input Values	
A_a * Record ID	{!Save_Response}

Cancel Done

In the end, Sergio's Flow will look like the following screenshot:

1. Click Save.

2. Enter Flow Label the API Name will auto-populate.

3. Click Show Advanced.

4. How to Run the Flow: User or System Context—Depends on How Flow is Launched

5. Type: Screen Flow

6. API Version for Running the Flow: 51

7. Interview Label: Survey

{!\$Flow.CurrentDateTime}

8. Click Save.

Cancel Save

Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

1. Click **Setup | Developer Console**
2. Navigate to **File | New | Lightning Application**
3. Enter a **Name (VFPPageToLC)** field, make sure to select the **Lightning Out Dependency App** checkbox.
4. Click **Submit**.
5. Copy code from [**GitHub**](#) and paste it into your Lightning Application.
6. **Save** your code.

The screenshot shows the Salesforce IDE interface. At the top, there is a menu bar with options like File, Edit, Debug, Test, Workspace, Help, and navigation arrows. Below the menu is a tab bar with 'VFPageToLC.app *'. The main area contains the following code:

```
1 <aura:application access="global"
2     extends="ltng:outApp"
3     implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5 </aura:application>
```

At the bottom of the interface, there is a blue footer bar with the text 'Logs, Tests, and Problems' and a small icon.

Step 6: Create a Visualforce Page and Embed Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the **<apex:includeLightning/>** component. In the Visualforce page, reference the dependency app. Then write a JavaScript function that creates the

component on the page using `$Lightning.createComponent()`

1. Click **Setup**.
2. In the Quick Find box, type **Visualforce Pages**.
3. Clicks on the **New** button.
4. Copy code from [GitHub](#) and paste it into your visualforce page
5. Click **Save**.

The screenshot shows the Salesforce Visualforce Page editor. At the top, there's a header with 'Visualforce Page' and 'Survey'. Below it is a 'Page Edit' toolbar with 'Save', 'Quick Save', 'Cancel', 'Where is this used?', 'Component Reference', and 'Preview' buttons. A note 'I = Required Information' is present. The main area has a 'Page Information' section where 'Label' and 'Name' are set to 'Survey', and a 'Description' field is empty. Under 'Available for Lightning Experience, Experience Builder mobile, and the mobile app', the 'Checkmark' checkbox is checked. Under 'Require CSRF protection on GET requests', the checkbox is unchecked. Below this is a 'Visualforce Markup' tab which contains the following code:

```
<apex:page showheader="false" lightningStylesheets="true">
<html>
<head>
<apex:includeLightning />
<!--Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualforce page-->
</head>
<body class="slds-scope">
<div id="flowContainer" />
<script>
var statusChange = function (event) {
    if(event.getParam("status") === "FINISHED") {
        var outputVariables = event.getParam("outputVariables");
        var key;
        for(key in outputVariables) {
            if(outputVariables[key].name === "myOutput") {
                ...
            }
        }
    }
};
$Lightning.use("c:VFFPageToLC", function() {
    $Lightning.createComponent("lightning:flow", {"onstatuschange":statusChange},
        "flowContainer",
        function (component) {
            component.startFlow("Survey", );
        }
    );
});
</script>
</body>

```

Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

1. Click **Setup**.

2. In the Quick Find box, type **Sites**.
3. Clicks on the **New** button.
4. Fill the details as per the screenshot below:
5. Click **Save**.

The screenshot shows the 'Site Edit' page in Salesforce. The page has a header with 'Site Edit' and buttons for 'Save' and 'Cancel'. It contains several input fields and dropdown menus for configuring a site. The 'Site Label' and 'Site Name' are both set to 'Survey'. The 'Default Web Address' is 'http://kathiarch-developer-edition.gus.force.com/survey'. The 'Active' checkbox is checked. Under 'Site Pages', 'Active Site Home Page' is 'Survey' and 'Inactive Site Home Page' is 'InMaintenance'. The 'Site Template' is 'SiteTemplate'. There are also fields for 'Site Robots.txt', 'Site Favorite Icon', 'Analytics Tracking Code', 'URL Rewriter Class', 'Enable Feeds' (unchecked), 'Clickjack Protection Level' (set to 'Allow framing by the same origin only (Recommended)'), 'Require Secure Connections (HTTPS)' (checked), 'Lightning Features for Guest Users' (checked), 'Upgrade all requests to HTTPS' (checked), 'Enable Content Sniffing Protection' (checked), 'Enable Browser Cross Site Scripting Protection' (checked), 'Referrer URL Protection' (checked), and 'Guest Access to the Payments API' (unchecked).

Under site, **Public Access Settings** make sure that guest users have **Create** access on **Survey Result** object and **Edit** on the **fields**.

Proof of Concept

Now onward, if someone opens the site url and fills the form:

Survey

Thank You For Completing Our Survey!  [Inbox](#) 

 **Survey Site Guest User** via [bj9amq6fe7r.b-cdzwmaa.gs0.bnc.salesforce.com](#) to me  8:09 PM (1 minute ago)   

Hi Alok Sinfal,

Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.

Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.

Thanks,
Automation Champion
